

## AIRWAY MANAGEMENT (BASIC & ADVANCED) COURSE OUTLINE

**Course Duration:** 2 days

**Suitable candidates and pre requisitions:** Managing a patients airway is the most vital element of life support. This airway management course has been designed as a continuous professional development course or as an additional subject to medical professionals.

This course has two elements enabling basic first aiders and medical professionals to attend. Day 1 will be focusing on basic airway management and day 2 will be advanced. Only advanced practitioners can complete day 2. These include ALS providers, RGN, paramedics, offshore medics etc.

As this is a CPD or refresher course students will need to have the relevant qualifications prior to commencing this course.

**Method of Tuition:** Interactive theoretical tuition combined with extensive practical sessions. There is no formal assessment but each student will be monitored throughout the course by the tutor.

**Course Objectives:** Provide the student with the knowledge and skills to manage a patients airway, utilising both basic and advanced techniques.

**Costs (Ex VAT): £100.00 (per day)**
