

New Training Centre

Medipro Training have recently moved to a new training centre based in Stokesley, North Yorkshire. This was a much needed move to enable the business to grow with the current demand. We have seen a dramatic increase in student numbers over the last 6 months which we believe is largely due to our approval list and the quality of our faculty. Our new training centre increases our teaching capacity by introducing more classroom space as well as a dedicated IT resource suite, fully air-conditioned rooms and access to our outdoor centre in the Cleveland Hills. We hope you can come along and visit us soon.

Medipro Training Ltd, Millennium Court, Ellerbeck Way, Stokesley, TS9 5JZ

NEW COURSES/APPROVALS

We have been working hard to introduce more approved courses to our portfolio, not only to improve our scope of delivery but to meet the demands of our customers. When it comes to Pre-Hospital care the Royal College of Surgeons are one of the most prominent organizations known to all clinicians. This is why we have introduced the following courses which are ALL approved by the RCS Edinburgh:

- Pre Hospital Medical Technician
- Pre Hospital Trauma Management
- Ambulance Emergency Care Support Worker
- Tactical and Close Protection Critical Care Training
- Remote and Expedition Medicine
- Trauma Response for Fire Fighters

Other approval also gained over recent months include:

- IMCA Diver Medic

HSE Offshore Medic Refresher (Distance Learning)

We now have a distance learning option for offshore medics. This saves huge amounts of time and money as the 5 modules can be completed over several months. Each student then needs to complete a 2 day update/assessment course to complete their programme. See our website for further details

NEW FACULTY

As we continue to develop and introduce new courses we are always looking for new additions to our team of instructors. If you have a clinical background with a relevant teaching qualification or experience, we would like to hear from you. Please email CV's to info@mediprotraining.co.uk. We particularly would like to hear from doctors and nurse clinicians.

MOD Students (ELCAS)

It has been sad news over recent months as the Government plans to reduce our armed forces troops. We have tried to build a portfolio of courses designed to assist the transition into civilian life for these individuals and are pleased to offer the following courses as part of the ELC funding scheme:

HSE Offshore Medic

IMCA Diver Medic

Pre Hospital Medical Technician

Ambulance Emergency Care Support Worker

Tactical and Close Protection Critical Care

Pre Hospital Trauma Management
