

## PRE HOSPITAL MEDICAL TECHNICIAN COURSE OUTLINE – RCS Ed (ELCAS Approved)

**Course Duration:** 4 weeks

**Suitable candidates and pre requisitions:** As an Emergency Medical Technician there is no current awarding body or protected title. There are various EMT courses available throughout the UK and many don't offer the credibility, in-depth clinical knowledge and skills that is required of such a role. We have developed an comprehensive and robust Emergency Medical Technician programme that is fit for purpose and will enable the clinician to safely practice and ensure they deliver excellent clinical care to their patients.

We have developed this programme with the patient as our main focus, from the medical emergency to the major trauma victim. This course offers a diverse scope of practice that will appeal EMT's working in the major industry and chemical sites, medical support centres as well as the private NHS services.

No pre course requirements

**Method of Tuition:** Interactive theoretical tuition combined with extensive practical sessions and assessments.

**Course Objectives:** Provide the skills and techniques to enable the student to effectively and confidently manage any emergency incident.

**Costs (Ex VAT):** £1950.00

### SOME OF THE TOPICS COVERED INCLUDE:

|   |                         |
